

Principles of PlayTogether

Playgroups welcome and include everyone

Playgroups accept and celebrate the differences and strengths of all children and families

There are all sorts of ways to play

Playgroups consider the needs of families (social, communication, movement, sensory processing, etc)

Changes / accommodations / strategies that benefit one child will benefit all children

Playgroups use more than one form of communication

Playgroups provide a quiet area for children and adults to take a break

The playgroup space is accessible for people with a physical disability
